What are Accounting Principles? Definition: Accounting principles are the building blocks for GAAP. All of the concepts and standards in GAAP can be traced back to the underlying accounting principles. Some accounting principles come from long-used accounting practices where as others come from ruling making bodies like the FASB. It's important to have a basic understanding of these main ...

Accounting is based on the principle of two-sided. In order to carry out business activities, the company needs funds; these funds must be given to the company by someone. The funds owned by the company are called assets. Part of these assets is provided by the owner, total amount of funds

contributed by him is called owner's equity or capital. If the owner is the only one who contributed ...
