Dialysis Access Current Practice

A hemodialysis access, or vascular access, is a way to reach the blood for hemodialysis. The access allows blood to travel through soft tubes to the dialysis machine where it is cleaned as it passes through a special filter, called a dialyzer. An access is placed by a minor surgery. As a hemodialysis patient, your access is one of the following: A fistula, an access made by joining an artery and vein in your arm.
