Glossary of Otolaryngology Terms

In Sjogren's syndrome, the mucous membranes and moisture-secreting glands of your eyes and mouth are usually affected first — resulting in decreased tears and saliva. Although you can develop Sjogren's syndrome at any age, most people are older than 40 at the time of diagnosis. The condition is much more common in women.

Sjogren's syndrome - Symptoms and causes - Mayo Clinic

These structures between eye and nose consist of connective tissue fibers in helical structural arrangements. Research has found that the lining of the nasolacrimal duct has a layered structure, similar to the tear film. 1 Laboratory study into the expression of mucins in the lacrimal sac and nasolacrimal ducts has revealed that the efferent tear ducts produce a range of mucin types, and ...

The Eye and the Nose:What's the Connection?

Keratitis, or inflammation of the cornea, can be a sign of Lyme disease, according to the Merck Manual. Keratitis may cause pain in the eye, light sensitivity, tearing and blurred vision. The eye may appear opacified, or covered with a white haze. Prednisone, a steroid, is given as eye drops, or by mouth for two to six months in deeper infections.

Ocular Signs of Lyme Disease | Healthfully

Hand-foot-mouth disease is a viral infection that tends to impact young children. The symptoms are mild and, as the name implies, affect the hands, feet and mouth with the development of skin blisters. The disease is contagious and can be passed from child to child.
