with any devices to read

Ebooks are available as PDF, EPUB, Kindle and plain text files, though not all titles are available in all formats.

### **Flap Gates Hydro Gate**

Flap Gates. Hydro Gate® flap gates are made of cast iron, stainless steel, aluminum, or rubber depending on the type of service. A small differential pressure on the back of the gate causes it to open automatically to allow discharge through levees, sewer lines or drainage conduits. When water on the face side of the gate rises above water on the back side, the gate closes automatically to prevent backflow.

gates and fixed-wheel gates.

### **Crest gate (Bottom hinged flap gate) - Mekan-Hydro**

Minimal water pressure is needed for operation as the flap gate functions utilizing gravity. The flap opens when the head in the pipe, or conduit, exceeds 0.2 feet (0.6m) above the head in the receiving body of water. The flap closes when the head in the receiving body of water exceeds the head in the pipe or conduit.
