Summary: in this tutorial, you will step by step learn how to install the SQL Server 2017 Developer Edition and SQL Server Management Studio (SSMS).. Install SQL Server 2017 Developer Edition. To install SQL Server, you need to download it from the Microsoft.com website via the following link:

### How To Install SQL Server Developer Edition

Ansible's raw module, and the script module, do not depend on a client side install of Python to run. Technically, you can use Ansible to install a compatible version of Python using the raw module, which then allows you to use everything else. For example, if you need to bootstrap Python 2 onto a RHEL-based system, you can install it as follows:

### Installing Ansible — Ansible Documentation

Re-executing the command should now print the latest Python 3.x information. As with the above command-line examples, you can specify a more explicit version qualifier. Assuming you have Python 2.6 installed, try changing the first line to `#!/usr/bin/python2.6` and you should find the 2.6 version information printed.

### 3. Using Python on Windows — Python 3.9.1 documentation

See Run MongoDB Community Edition from the Command Interpreter for instructions to start a MongoDB instance. Run MongoDB Community Edition as a Windows Service ¶ Starting in version 4.0, you can install and configure MongoDB as a Windows Service during the install, and the MongoDB service is started upon successful installation.

### Install MongoDB Community Edition on Windows — MongoDB Manual

Laravel Sail provides a simple command-line interface for interacting with Laravel's default Docker configuration: `cd example-app ./vendor/bin/sail up`. The first time you run the Sail up command, Sail's application containers will be built on your machine.

### **Installation - Laravel - The PHP Framework For Web Artisans**

If you have already installed the hMailServer server on another computer and you want to manage that remotely, you only need to install the Administrative tools. Select which start menu folder you want to place the hMailServer icons in and click Next. Confirm that the settings are correct and then click Install to do the installation. Wait...
