The aircraft for today is the McDonnell F2H Banshee which was the carrier based jet fighter of the US Navy and the US Marine Corps that served from year 1948 to 1961. The aircraft was developed mainly in its single seat configuration.

### **McDonnell F2H Banshee: The Carrier Based Jet Fighter**

The McDonnell F2H Banshee was a multimission aircraft: used as a day fighter, as a night fighter and for photoreconnaissance with one variant that was specially strengthened to carry nuclear weapons. It went into combat in 1951 and served as one of the principal fighters with the US Navy's Seventh Fleet for the duration of the Korean War.

First-fruits included the McDonnell FH "Phantom" which became the first all-jet aircraft to land on the deck of a USN aircraft carrier. A new specification by the service prompted McDonnell to continue their work and, using the FH as the foundation, the company responded with the larger and more powerful F2H "Banshee" series.
