Altius Technical Services' Industrial Rope Access Training ...

Rope access describes techniques used to access structures or geologic features where ropes are the primary means of support, positioning, and fall protection. Generally, a two-rope system is used. Rope-access methods require comprehensive training, specialized equipment, and perhaps most importantly, qualified supervision.

Rope access personnel should be able to recognise the symptoms of suspension pre-syncope. Motionless head-up suspension can lead to pre-syncope and sometimes syncope in most normal subjects within 1 hour and to 20% of subjects within 10 minutes. Syncope can follow thereafter at an unpredictable time.
